

The NexTraq Driver Safety Scorecard Report

Proactively ensure the safety of your drivers, your fleet and your business.

Improve visibility into how your drivers are driving your vehicles so you can protect your reputation and keep your drivers safe.

Features

The NexTraq[®] Driver Safety Scorecard Report is built from data obtained from accelerometers built into the hardware of NexTraq fleet tracking devices. The hardware identifies aggressive driving behaviors such as speeding, harsh braking, harsh acceleration and sudden cornering.

The NexTraq Driver Safety Scorecard Report identifies and ranks drivers based on these key driving behaviors as well as excessive speed so that business owners and fleet safety managers have visibility into how drivers drive and so they can identify drivers that are in need of coaching and improvement.

Benefits

- ⊗ Increase driver safety
- ⊗ Reduce the number of driving-related incidents
- ⊗ Save on fuel by reducing aggressive driving
- ⊗ Minimize vehicle wear and tear
- ⊗ Reduce insurance costs
- ⊗ Preserve your business' reputation
