

The NexTraq Vehicle Maintenance Module

Extend the life of your vehicles with maintenance schedules, logs and reports

Properly managing vehicle maintenance through the NexTraq® Fleet Tracking solution helps to optimize your vehicles and lets you know which vehicles need to be serviced and when.

Maintenance Schedules

NexTraq's easy-to-use maintenance schedules help take the guesswork out of serving your vehicles by alerting you when it's time for upkeep or repairs and lets you maximize your assets by ensuring preventive upkeep is occurring consistently and on schedule.

Create and schedule any desired maintenance for any or all vehicles

Type: Oil Change Enabled

Applies To: Selected Mobiles

Set reminders by days, miles or engine hours

Distance Interval: Every 6,000 Miles

Odometer Next Due: 49,237 mi Remind via email

Miles Before Due: 500

Time Interval: Every 90 Days Remind via email

Date Next Due: 10/19/2012

Engine Hour Interval: - None -

Engine Hours Next Due: hrs

Maintenance Logs

Track vehicle maintenance and view details of services performed to ensure maintenance policies are being followed and met. Tracking preemptive maintenance means healthier vehicles, lower fuel and repair costs and more employees getting their work done on any given day.

Track maintenance performed on any or all vehicles

Include odometer and/or engine hours at time of service

Edit	Delete	Mobile	Schedule	Date	Odometer	Engine Hours	Notes
		044	Oil Change Every 5,000 Miles or 180 Days	11/11/2011	175,012 mi		Oil Change

Logs show what maintenance was performed and when

Add notes for further detail including where service was done and how much it cost

Maintenance Reporting

NexTraq has three separate maintenance reports that give you a complete picture of your fleet:

- The Maintenance Schedule Detail Report
- The Maintenance Schedule Summary Report
- The Maintenance Logs Report
